### **EBSCOhost 2.0 – All Dressed Up and Ready to Go**

[EBSCOhost](#), one of the major database providers in GALILEO, rolled out Version 2.0 of its interface on July 16, 2008. Their new look includes improvements in both appearance and functionality. Among the many improvements are:

- A much cleaner Search screen
- Access to article abstracts without leaving the Search Results screen
- One-click citation generation
- One-click access to images related to your search

EBSCOhost gives us access to over 40 different databases containing millions of full-text articles from thousands of magazines, journals, and newspapers. This is one of the most valuable research tools in our collection.

The Library staff are excited about the new look at [EBSCOhost](#) and look forward to giving you a guided tour around the databases whenever it is convenient for you.
