Trade and Industrial

The accessCGTC portal can be set to allow you to connect directly to your ANGEL account without having to enter your user name and password each time.

Recommendation:

If you have not done so already, you should login to ANGEL to set your permanent ANGEL password before continuing with these steps.

Now to take advantage of accessCGTC's single sign-on (SSO) capability with ANGEL, follow these steps:

1. First enter the portal through any convenient link.

2. Login.

Secure Access Login

For

Using Single Sign On (SSO) with ANGEL
ANGEL (no External Account Synchronization)
ANGEL SSO (new browser window)

3. Click the ANGEL SSO link.

4. Enter your User Name for ANGEL, your Password for ANGEL, and click the **Save Account Information** button.

(Your ANGEL login information will be saved, and you will not see this dialog box again unless you change your ANGEL password.)

Note: See [ANGEL Information page](#) for login help.

5. Congratulations! You have logged into ANGEL, and you will be able to enter ANGEL directly from accessCGTC from now on. (However, your situation may require you to perform the next step, also.)

(Contingency step)

In the event that this is your initial login and ANGEL requires you to change your password, you will have to reset your *new* password the next time you try to enter ANGEL.

External Account Synchronization

Your external account password is not accessible. This could have resulted from a recent change of your system password.

Contact your **system administrator** to help you recover your **External Account Password**.

Or, if you remember your **External Account Password**, you may enter it below.
