Course: Software and Engineering Environment Readiness
Course Number: CGTCSER101
Course Length: 1 Day
Class Size: Up to 20

Course description:
The Software and Engineering Environment Readiness course introduces participants to an array of topics that will prepare them to work in defense related software and engineering environments. The training objectives will enable participants to work more safely in the engineering environment, with an awareness of how they can affect quality and productivity.

Some of the Course Topics Include:

- Fire safety and Prevention Training
- Community Information
- Protecting Scientific and Proprietary Data
- Health and Wellness
- Stress Management
- Bystander Intervention Training
- Formal Planning Activities
