

April 28, 2023

To whom this may concern:

The purpose of the Cybersecurity program is to provide for a sequence of courses designed to provide students with an understanding of the concepts, principles, and techniques required in computer information processing. Graduates are to be competent in the general areas of humanities or fine arts, social or behavioral sciences, and natural sciences or mathematics, as well as in the technical areas of computer terminology and concepts, program design and development, and computer networking.

The established Program Level Outcomes (PLOs) for the Cybersecurity program are listed below. The Program-Level Outcomes (PLOs) are equivalent to Student Learning outcomes (SLOs).

1. Students will have the ability to plan, coordinate, and implement information security.
2. Student will have the ability to install security software, monitor for and respond to security breaches.
3. Students will have the ability to prioritize tasks and work cooperatively within a team.
4. Students will have highly developed written and verbal and online communication skills.
5. Students will be able to use good judgement, problem solving, and analytical skills.

Further questions regarding the SLOs may be directed to Felicia Everidge, feveridge@centralgatech.edu, or Bridget Willis, bwillis@centralgatech.edu.

Sincerely,

Dr. Sabrina Swann
