

**Program Outcomes for Cardiovascular Technology**  
**Invasive Cardiovascular Technology Concentration**

*Results updated December 2023*

The Cardiovascular Technology degree program at Central Georgia Technical College received initial CAAHEP accreditation on March 31, 2015 and reaccreditation on March 19, 2021. The next comprehensive evaluation of the program including a site review, is scheduled to occur no later than 2024.

Per CAAHEP Standard V.A.4, the program will publish a 3-year review window average results of the outcomes for retention, positive placement, and national credentialing exam pass rate of the accredited program concentration.

<b>Retention by Graduation Year</b>	<b>2023</b>

**CCI RCIS Detailed Analysis**

Feedback from the students who have taken the RCIS said that it was heavy on vascular which they said they did not review much. Students also have not been reporting back to the program chair whether they have passed the exams or not in order to get accurate results for the annual report.

**CCI RCIS Action Plan**

The program chair has been in contact with individuals from Cardiovascular Credentialing International concerning the pass results and have received data from the past two years of students who say they attended CGTC RCIS results. The program is planning on turning the Registry review class back into an online class due to in the past students had higher pass rates with having the class online versus in person. This will not happen until the Spring 2024 semester. This was also discussed in the advisory committee meeting held on November 14th, 2023.
