

CGTCEPA608U – EPA 608 Technician Certification Course

The EPA 608 Technician Certification Course is a sixteen hour course that prepares participants for EPA Section 608 Universal Certification. The course introduces the regulation pursuant to Section 608 of the Clean Air Act, and the Montreal Protocol. Additional HVACR topics include safety, environmental impact, refrigerant states, gauges, and leak detection, refrigerant substitutions, oils, shipping of refrigerants, as well as system evacuation and recovery. The course concludes with participants undergoing the prescribed testing for the EPA 608 Universal Certification, which is proctored by CGTC faculty.
