COURSE DESCRIPTION:

CompTIA Security+ is a certification that validates the baseline skills you need to perform core security functions and pursue an IT security career. Security+ emphasizes hands-on practical skills, ensuring the security professional is better prepared to solve a variety of issues. Cybersecurity professionals with Security+ know how to address security incidents – not just identify them. The Security+ exam will certify that you have the knowledge and skills required to install and configure systems to secure applications, networks, and devices; perform threat analysis and respond with appropriate mitigation techniques; participate in risk mitigation activities; and operate with an awareness of applicable policies, laws, and regulations. The bootcamp prepares you to take the Security+ certification exam and provides a voucher for the exam.
